a Study design and residual definition

b Cohort and qualifying coverage

286 GDSC2 drugs assessed

43 included | 75 excluded | 168 unresolved

43 included drugs · 30 target labels

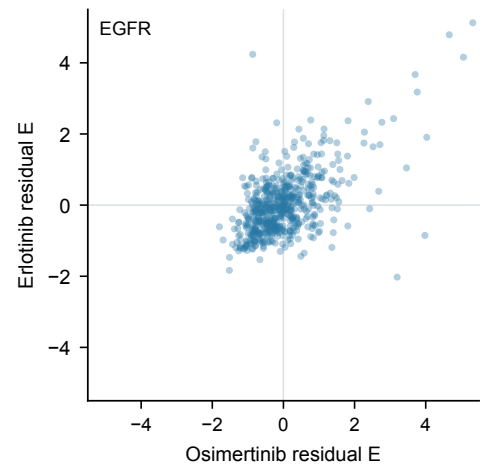

Target	GDSC2	PRISM
EGFR	4	3
MTOR	4	4
ESR1	3	2
TOP1	3	2
ATR	2	—
CHEK1	2	—

6 target groups · 18 focal compounds

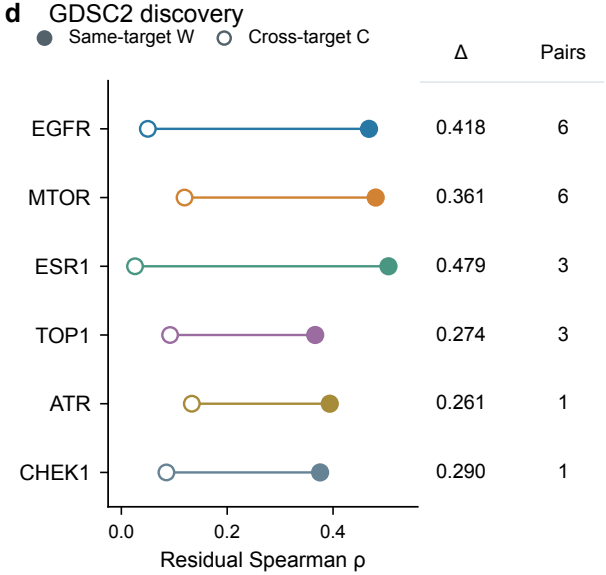

—: below group eligibility, not absence of drugs.

c Cell-line residual concordance

Spearman ρ = 0.481; n = 586 cell lines

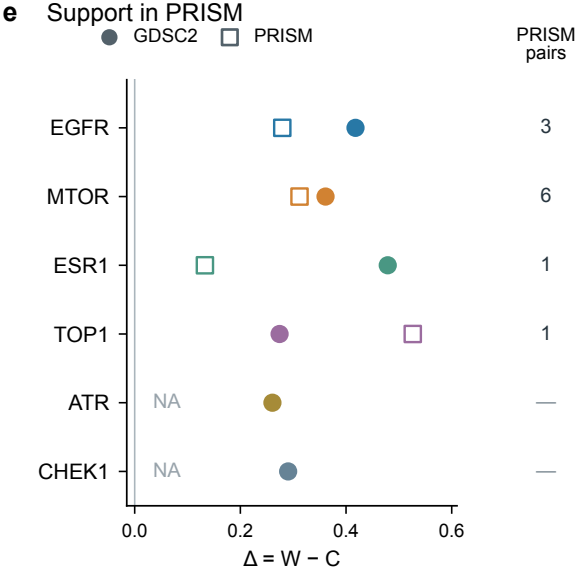

d GDSC2 discovery

Median Δ = +0.326

6 target groups · 20 within-target pairs

e Support in PRISM

PRISM: 30 drugs · 4 targets; median Δ = +0.296

NA: insufficient qualifying PRISM coverage.
