a Sensitivity to pharmacological restrictions

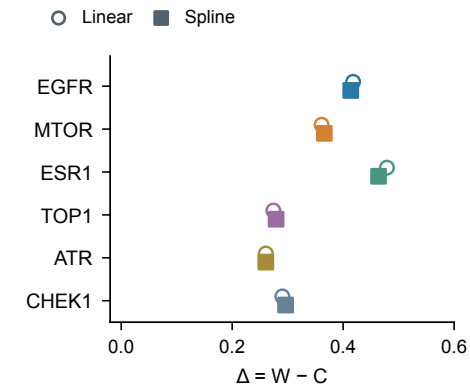

S0–S11: related sensitivity scenarios, not independent replications.
PRISM S11: 2 targets · descriptive only
—: ineligible. † S5/S6/S7/S11: fewer than 4 PRISM targets; coverage insufficient.

b Strict filtering: within- and cross-target sharing in GDSC2

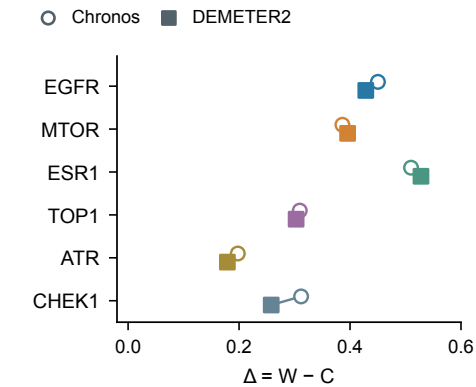

Same four targets: median Δ 0.390 → 0.362; TOP1 and CHEK1 lose eligibility.

c GDSC2: nonlinear residualization

GDSC2 median Δ: 0.326 → 0.331

d Dependency-source comparison

Median Δ: 0.3491 vs 0.3492
42 drugs · 6 targets · matched cells per drug
